

Acclaim 6°-60° Fresnel

Stage wash to dramatic highlight with one luminaire

Affordable and Easy to Use

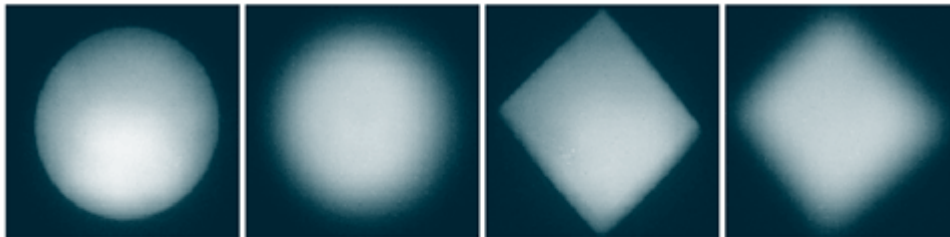

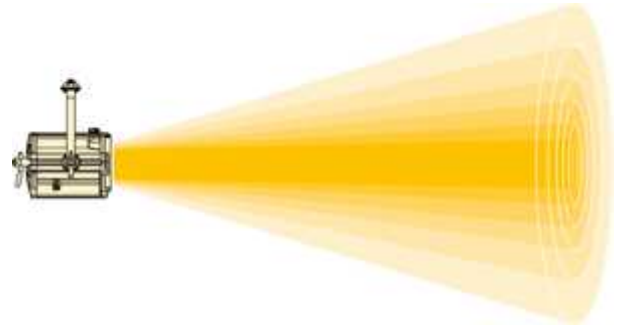

Selecon's popular Acclaim **Fresnel** is a general-purpose stage lens luminaire.

The adjustable beam angle range of 6° to 60° and wide range of available lamps make it the perfect choice for theatre, small studio, school hall and drama suites, and display lighting applications.

A smarter choice than a Par or Fixed Beam due to superior control and light quality.

Blend / Shape / Soften

The soft-edged **Fresnel** beam is the one required most often when lighting the stage blending seamlessly together with adjacent beams for even area illumination with no need for the addition of frost filters to soften hard edges or to smooth out irregularities or hot spots.

Passion for Performance

Selecon combines passion for performance lighting with skills in technology and engineering, delivering **stage lighting tools for everyone**.

220-240V: 500W / 650W
120V: 575W / 650W

The Selecon difference

Cool Touch Technology

Innovative design, new materials and passive heat management system deliver cooler focus knobs, front accessory slot access and rear grab handle touch points - no need for gloves or tools!

Safety First!

Simple, common-sense safety features such as automatic mains power isolation via microswitch when opened for relamping - no chance of mounting a lamp into a live socket.

Up to 40% more light output than comparative Fresnel luminaires!

Precision Control

Fast, easy beam control with simple 'twist and slide' focus screw knob.

Large, cool touch rear handle aids focus positioning.

Adjustable tilt locking mechanism.

Beam Shaping and Rigging

Shape or mask the light beam using the 4-leaf barndoor; a necessary tool for effective and creative stage lighting.

Integrated safety cable ensures this rigging accessory is always to hand.

Affordable Performance

- o **Useful throw distances** : 2-10m.
- o Adjustable beam angle range of 6° to 60°.

Precision

- o Simply slide the heat-insulated focus screw knob to the beam angle you require. Quick, easy and convenient - a task achieved in seconds without the use of tools.
- o Unique posi-slide lamp / lens focus action and spring dampening design minimises sticking and vibration, maximising lamp life.
- o Effectively shape / mask the flood to medium spot beam using the four-flap barndoor accessory.

Simplicity

- o Improved filter life through the increased airflow of the heat management system.
- o Large, heat-insulated rear grab handle assists with focusing; doubles as a handy cable (1m/3ft) wrap for safe and tidy storage.
- o Easy to use tilt adjustment mechanism locks luminaire in place ensuring a stable mounting position.
- o Heat-insulated retention cover securely locks accessories in place.

Safety - Stage Lighting for All

- o Automatic mains power disconnection when the side swing-down door is unlatched for lamp, cleaning or maintenance access.
- o Failed lamps are removed quickly and safely via the quick release ejector mechanism without altering the focus position.
- o The integral safety chain design ensures this important accessory is always to hand making it easy to comply with worldwide mandatory and standard practice rigging requirements. It can be kept out of the way simply by pulling it back into the luminaire. Rated for the fitting with a maximum free length = 650mm / 25 1/2". **Click here for the rating test certificate**, supplied by an independent accredited testing agency (.pdf 91kb).

Supplied with

- o Integral safety chain, 1x colour frame, M12 nut and bolt set, 1m/3ft cable and a short form instruction manual.
- o **Three-year Warranty.**

Barndoor accessory

Allows for the full use of lens luminaires as a creative lighting tool.

Barndoor accessory for the Selecon Acclaim Fresnel and PC for shaping and masking the light beam.

The four flaps can be rotated around the beam to mask (shape) the light as required. Effective from mid to flood focus; in spot focus the barndoor reduces distracting glare.
