

Grandview Motorised Sky-Show Large Screen

If you're looking for a large size screen to suit high ceiling venues, the Grandview Motorised Sky-Show is the right screen for the job. The world's first large motorised projection screen to offer a built-in-self-winding cable system, with a generous 5 metre heavy duty belt system.

Reliability and safety are paramount with the Sky-Show, with security features including the unique brake mechanism and anti-collision system designed to stop the screen from retracting if there is an obstacle obstructing the screen. This protects the user and the screen from possible damage.

Using two separate motors; one to lower the drop down belt system and the other to operate the screen. They are both contained in a single housing and can be run independent of each other or simultaneously.

Operation is easy. The belt system lowers the casing to position and then the screen is lowered for viewing. Including a generous 200mm black leader to allow extra height allowance. Operated by close contact for integrating into control systems and includes a radio frequency remote for programming only. Supplied in black casing. Range of aspect ratio, 4:3, 16:9 and 16:10.

Features:

- Solves the problems associated with mounting in situations with very high ceilings or long screen drop requirements eg churches or auditoriums.
- The single screen casing holds two motorised roller tubes, one for lowering the casing into position, the other for lowering the screen.
- Each motor operates independently via close contact/dry contact.
- The casing can be lowered a total of 5000mm (5m) into position. Sizes up to 3050mm image width lower using a stainless steel cable. Above this size, a heavy duty belt and braking system is used.
- The screen is then lowered in the same way as any other motorised roller screen.
- IMPORTANT: The Sky-Show is controlled via close contacts which are perfect for easy integration.
- An RF remote is supplied for programming and operation.
- Simple programming and limit setting, all instructions included.
- Casing is supplied standard in black.

| Product code | Aspect ratio | Image size (Diagonal) inch | Image size (W x H) mm |
|-----------------|--------------|----------------------------|-----------------------|
| GRCE180V | 4:3 | 180" | 3660 x 2745 |
| GRCE200V | 4:3 | 200" | 4065 x 3050 |
| GRCE240V | 4:3 | 240" | 4880 x 3660 |
| GRCF150H | 16:9 | 150" | 3320 x 1870 |
| GRCF180H | 16:9 | 180" | 3985 x 2240 |
| GRCF220H | 16:9 | 220" | 4870 x 2740 |
| GRCG150C | 16:10 | 150" | 3320 x 2020 |
| GRCG180C | 16:10 | 180" | 3875 x 2425 |
